

H U N T E R S

Toyuhō Kagemori

born Toyuhō · the Survivor

CHARACTER GENESIS DOSSIER

PREMIUM COLLECTOR'S EDITION · 2.0

The Giant Hunt · Giantverse Record GV-TOY23

FOUNDING COHORT · FIRST PRINTING

This record belongs to

Toyuho Kagemori

known before the Hunt as Rajeev

One identity. One record. One entry in the world-record attempt.
No other copy of this book contains this name.

GV - TOY23

Contents

I	Identity	Who arrived, and who was revealed
II	Archetype Analysis	The Survivor, measured and mirrored on screen
III	The Wheel of Thirty-Two	Your position — and the engine beneath it
IV	Giantverse Lore	The realm and guild that raised your character
V	The Cast Around You	Eight design briefs derived from your seat
VI	Hero Journey	Seven beats of your personal Hunt
VII	Character Design Blueprint	Your professional design brief
VIII	Design Masterclass	Nine lessons, four studios, three pipelines
IX	Drawing Workbook	The exercise ladder and thirteen sheets
X	The Giant Hunt	Submission, judging, and the record
XI	Founding Creator	Your place in the first cohort

Throughout this book: **MASTER STUDY** pages analyse legendary characters, **PROFESSIONAL SECRET** pages carry industry wisdom, and every page closes with a design spark — one hundred of them, no two alike. Read cover to cover, or raid it like a reference shelf. Both are correct.

“

The way to get started is to quit talking
and begin doing.

WALT DISNEY

WHY THIS OPENS THE CHAPTER

This dossier begins with who you are — but it exists so you will draw. Every page of analysis that follows is fuel for a pencil. Read it the way Disney meant it: as the shortest possible route to begin.

IDENTITY · RECORD ONE

The Name You Were Given

Every citizen of the Giantverse carries two names. The first is given. The second is earned.

BIRTH NAME

Toyuho

LEGACY NAME

Toyuho Kagemori

THE MOTTO

“I will rise from the ash, proving that our light cannot be crushed.”

The Legacy Name is not a replacement of the Birth Name — it is the Birth Name, kept. Toyuho is who arrived at the Hunt. Toyuho Kagemori is who the Hunt revealed. Both are entered in this record, and both are yours.

Heroes wear history.

Official Identity Record

GIANTVERSE ID	GV-TOY23
REAL NAME	Rajeev
BIRTH NAME	Toyuho
LEGACY NAME	Toyuho Kagemori
ORDER	Order of Hunters
PRIMARY ARCHETYPE	Survivor · Seizon (生存)
SECONDARY ARCHETYPE	Builder · Kensetsu
HOME REALM	The Broken Heart · Harai
CALLING	Guild of Survivors
PERSONAL SYMBOL	The Relit Hearth

SYMBOL MEANING

Endurance is not the absence of ash — it is the second fire.

GUILD TAGLINE

Those who endure, adapt, and begin again.

REALM

Where survival becomes renewal. Not a fixed place, but what Maruto becomes when civilization falls out of balance. Harai is temporary by nature — when balance returns, it transforms back into Maruto, a cycle called The Great Turning.

Every scar answers a question.

IDENTITY · RECORD THREE

The Four Traits

Four words the record-keepers chose for the Survivor — and what each one means when it is yours.

GRIT

Endure what breaks others.

ADAPTABILITY

Bend but don't break.

RESOURCEFULNESS

Make use of anything.

UNBREAKABLE RESOLVE

Nothing keeps you down.

WHY THIS MATTERS — Four traits is a designer's number: one per limb of the silhouette. When you reach the workbook, assign each trait a physical home — a stance, a garment, a prop, a scar — and the abstract becomes drawable.

Costume is biography.

PROFESSIONAL SECRET · NO. 1

Professionals don't start with faces.
They start with silhouettes.

A face is a detail. A silhouette is a decision. Every studio pipeline in this book runs in that order.

“

Be wrong as fast as you can.

ANDREW STANTON · PIXAR, WALL-E, FINDING NEMO

WHY THIS OPENS THE CHAPTER

An archetype reading is a first draft of a person. Treat the percentages in this chapter like Pixar treats story reels — a fast, honest guess to be improved, not a verdict to be obeyed.

ARCHETYPE · ANALYSIS

The Survivor

Endures; resilience is the value they hold above all others.

PRIMARY · SURVIVOR

82%

Confidence — how consistently your answers converged on this archetype.

SECONDARY · BUILDER

51%

The current running underneath the primary.

GROWTH ARCHETYPE

Builder (Kensetsu) — the wheel-neighbour your scores already lean toward. Growth in the Giantverse is a drift, not a leap.

SHADOW ARCHETYPE

Distrust and Isolation — Treats every calm moment as the quiet before the next disaster, and lets no one close enough to prove otherwise.

Every accessory should be earned.

Strengths & Weaknesses

STRENGTHS

GRIT

Endure what breaks others.

ADAPTABILITY

Bend but don't break.

RESOURCEFULNESS

Make use of anything.

UNBREAKABLE RESOLVE

Nothing keeps you down.

THE WATCH-LIST

Distrust and Isolation

Treats every calm moment as the quiet before the next disaster, and lets no one close enough to prove otherwise.

A shadow is not a flaw list — it is your signature strength with the brakes removed. The watch-list exists because every entry on the left column can become the entry on the right.

Behavioural Facets

Five working modes, scored from the archetype's underlying dimension weights.

Design emotion before beauty.

ARCHETYPE · FIELD NOTES

Under Pressure & In Study

STRESS BEHAVIOUR

Under pressure, plays not-to-lose — options narrow to the safest. Recovery comes through pricing the cost of the safe option out loud.

LEARNING STYLE

Learns by safety — masters material fastest in low-stakes reps before any public test.

DECISION MAKING

The Survivor decides through grit first and unbreakable resolve last — reversing that order is the most common self-reported regret of this archetype.

Field notes are directional, not diagnostic — drawn from the archetype model, not from psychology. Use them the way a character designer would: as acting notes.

Movement begins with shape.

The Survivor on Screen

Five characters the world already loves, built from your archetype — study what their designers did with it.

TANJIRO KAMADO · DEMON SLAYER

Wound: a family lost in one night. His resilience is gentle, not hard — he endures by refusing to let grief curdle into cruelty. Posture: forward-leaning, weight low, always mid-approach.

ROCK LEE · NARUTO

Wound: born without the talent his world measures. His survival is repetition made sacred — training as prayer. Posture: coiled symmetry, fists close, a body that has memorised effort.

LEVI ACKERMAN · ATTACK ON TITAN

Wound: raised beneath the city that discarded him. Endurance turned to lethal economy — no wasted motion, no wasted trust. Posture: still shoulders, weight centred, eyes doing the moving.

VIOLET EVERGARDEN · VIOLET EVERGARDEN

Wound: a childhood spent as a weapon. Survival means learning, word by word, what feelings are. Posture: parade-straight spine slowly learning to soften.

THORFINN · VINLAND SAGA

Wound: revenge consumed his youth. True survival begins after the goal dies — rebuilding a self without an enemy. Posture: from crouched aggression to open-handed calm, the arc drawn in stance alone.

People remember contrast.

What Their Designers Knew

Five Survivors, five different wounds — and notice: none of them is designed around strength. Each is designed around WHAT SURVIVAL COSTS. Their costumes carry the bill: Tanjiro's inherited haori, Lee's bandaged hands, Levi's cravat (the one soft thing), Violet's gloves, Thorfinn's scarred bare arms.

THE PATTERN — Survival is never drawn as muscle. It is drawn as evidence: what the character keeps, repairs, refuses to put down. Your symbol — The Relit Hearth — is that evidence, pre-designed. The pages ahead tell you where to put it.

The audience reads shape before colour.

Writing the Wound

Your record already contains the raw material — read it as a psychologist, then draw it as a designer.

THE WOUND

Every Survivor design starts from what was survived. Your realm supplies it: The Broken Heart, where calm is always provisional. Decide the ONE event your character measures all others against — you never have to draw the event, only its receipts.

THE COMPENSATION

Distrust and Isolation is the shadow — which means the design should show OVER-preparedness: gear for disasters that may never come, exits mapped by habit, a bag never fully unpacked.

THE SOFT CONTRADICTION

Give the design one element that argues with the wound — a kept toy, a repaired keepsake, the Relit Hearth token worn openly. The contradiction is where the audience falls in love.

THE BODY REMEMBERS

Posture is the wound made visible: weight on the balls of the feet (ready to move), back never fully to a door, hands that check the token when calm. Write three such habits; draw two.

Draw the decision, not the drawing.

Tanjiro Kamado

Demon Slayer · Koyoharu Gotouge

SILHOUETTE

A gentle rounded head over a squared uniform — circle psychology carried on a soldier's frame. You read 'kind' and 'disciplined' in the same second.

COSTUME AS INHERITANCE

The checked haori is his father's; the hanafuda earrings are a family rite. Nothing on him is decoration — every element is inherited, which is why fans defend each one.

THE SCAR

Placed on the forehead — the first place the eye lands after the eyes themselves. His history is literally the second thing you read.

COLOUR LOGIC

Sea-green check against black keeps him calm amid a cast of loud palettes; the red earrings are his 5% accent, doing all the emotional pointing.

APPLIED TO YOUR RECORD — Your record gives Toyuho Kagemori the same tools: a symbol to inherit, a realm whose damage stays legible, and a triangle-family frame to carry it. Decide what your character refuses to take off — then make it small, placed where the eye lands second.

Master studies teach principles, never imitation. Study why it works; design your own answer.

A pose is personality under gravity.

“

A character should be recognisable from
the silhouette of their position — who
they stand beside, and who they stand
against.

PARAPHRASED FROM CHARACTER-DESIGN PRACTICE POPULARISED BY
AKIRA TORIYAMA'S ENSEMBLE WORK

— paraphrased, as labelled

WHY THIS OPENS THE CHAPTER

The Wheel is the Giantverse cast photo. Where you stand on it — your neighbours,
your opposite — is itself a piece of design information, and this chapter teaches you to
read it like a designer.

The Wheel of Thirty-Two

Your position among all thirty-two archetypes. Gold — you. Pale gold — your wheel neighbours.

Blue-grey — your Guild. Red — your Opposite. The arrow marks your growth direction.

ARCHETYPE · MAP

Reading Your Position

CURRENT POSITION

Position 24 of 32 — the Survivor (Seizon).

NEIGHBOURING ARCHETYPES

Builder (Kensetsu) · Scout (Teisatsu) — the directions of natural drift as your answers evolve.

COMPATIBLE ARCHETYPES

Reformer · Pathfinder — your fellow members of the Guild of Survivors.

OPPOSITE

Philosopher (Tetsugaku) — not an enemy: the other answer to your shared question.

THE CENTRAL QUESTION

Should we understand first, or endure first?

GROWTH DIRECTION

Toward the Builder — the neighbour your scores already lean into.

Damage is a receipt, not a texture.

How This Book Was Computed

Every recommendation in this dossier is traceable to a decision below. No page is arbitrary.

01	BIRTH DATA	Name, day and month seed the syllable tables that mint your Birth Name — deterministic, so your name is a fact, not a roll.
02	IDENTITY	Sixteen questions sampled from a 112-question bank, two per psychological dimension, so no two Hunts ask the same paper.
03	SIGNALS	Every answer becomes a weighted signal across eight dimensions — values, fears, dreams, power, people, decisions, leadership, motivation.
04	ARCHETYPE	Thirty-two archetypes score your signal profile; the leader must clear its own confidence threshold to claim you.
05	WHEEL POSITION	Your archetype's seat fixes neighbours, guild-mates and your opposite — the cast chapter is computed from these adjacencies.
06	REALM & GUILD	Archetype determines realm bias and guild; realm supplies materials and textures, guild supplies oath and reputation.
07	PSYCHOLOGY	Dimension weights are re-projected as behavioural facets, stress behaviour and the shadow — your strength with the brakes removed.
08	SHAPE LANGUAGE	Trait families map to classical shape theory: endurance and drive to triangles, order to squares, communion to circles.
09	PALETTE	Realm materials set the 70/25 base; your Order's signal colour is reserved as the 5% accent.
10	BLUEPRINT	Every recommendation on the design pages cites one of the layers above — nothing is arbitrary, everything is traceable.

Why the Engine Works This Way

WHY A QUESTION BANK?

A fixed quiz produces fixed answers shared online within a week. Sampling from 112 questions keeps every Hunt personal and every dossier honest.

WHY CONFIDENCE, NOT CERTAINTY?

The engine reports 82%, never 100% — because people are not lookup tables. The remainder is yours to overrule, and the retake exists for exactly that.

WHY A WHEEL AND NOT A LIST?

Adjacency is information: growth is modelled as drift to a neighbour, rivalry as opposition across the circle. Geometry stores psychology.

WHY DOES THE SHADOW GET A PAGE?

Design theory: villains and flaws generate more visual ideas than virtues. The shadow is your strength inverted — which makes it drawable.

THE HONEST FRAME — The engine is a model, and models are arguments, not oracles. Its job is to hand you a defensible starting point and show its working — yours is to overrule it wherever your own evidence is stronger.

One accent, placed, beats five, scattered.

PROFESSIONAL SECRET · NO. 2

The audience remembers contrast, not detail.

One sharp value change outlives fifty perfect buckles. Spend your effort
where the eye actually goes.

“

A character is shaped by the world that
raised them, long before the artist
arrives.

PARAPHRASED FROM HAYAO MIYAZAKI'S WRITINGS ON WORLD-BUILDING

— paraphrased, as labelled

WHY THIS OPENS THE CHAPTER

Ghibli films begin with places, not faces: the town teaches you who the character must be. Read your Realm and Guild pages the same way — as the childhood your character wears.

The Broken Heart (Harai)

Where survival becomes renewal. This is the ground that shaped Toyuho Kagemori — read it as a designer reads a character's childhood.

ANCIENT HISTORY

Harai has no founding date because Harai is not a place — it is what Maruto becomes when balance fails. Every continent's histories record its visits: the drought years, the siege years, the years the ledgers burned. And every history records the same ending: The Great Turning, when Harai becomes Maruto again.

CULTURE

Harai culture is triage made noble. Rank means little; usefulness means everything. Its people share tools before names and count wealth in what still works. Humour survives here in its driest, toughest form.

TRADITIONS

The First Repair: when a community begins recovery, the first thing rebuilt is chosen by the youngest present. Whatever they pick — a well, a doorway, a toy — is restored with full ceremony, to prove that rebuilding has rules of the heart, not only of need.

The eye trusts asymmetry.

The Broken Heart: Craft & Arms

ARCHITECTURE

Salvage-built and honest about it: braced ruins, patched vaults, new walls seamed visibly into old. Harai builders leave the damage legible — a structure should remember what it survived.

WEAPONS

Whatever is at hand, maintained obsessively. The Harai blade is notched, oiled, and utterly reliable. Doctrine is simple: waste nothing, especially not people.

SYMBOLS

The visible seam; the relit hearth; the broken circle redrawn — not closed, but continuing.

WHY THIS MATTERS — The Broken Heart culture keeps damage legible, so your costume carries visible repairs. Costume becomes biography: every seam is a sentence about a day the character survived.

Simplicity is what survives affection.

LORE · HOME REALM

Legends of The Broken Heart

They speak of the Ash Registrar, who walks ruined districts recording not what was lost but what was saved, and whose ledger — read aloud at the Great Turning — is said to be the longest poem in the world.

Every child of The Broken Heart grows up on this story. Whether Toyuho Kagemori believes it, resents it, or is quietly trying to live up to it — that choice is character design, and it is yours to make.

A character who can wait can fight.

LORE · CALLING

Guild of Survivors

Those who endure, adapt, and begin again.

ORIGIN

Chartered in the ashes of the Third Harai, when the relief crews who had improvised the recovery refused to disband, arguing — correctly — that they would be needed again.

THE OATH

“I endure, I adapt, and I leave a path behind me.”

THE HALL

The Seam Hall, rebuilt in every generation from the salvage of the most recent disaster, its walls a visible chronology of everything the continents have withstood.

Negative space is load-bearing.

LORE · CALLING

Rites & Reputation

THE RITE OF ENTRY

Initiates are given a ruined thing — tool, map, plan, reputation — and one season to return it to service. Perfection is not required; function is.

REPUTATION

The Guild everyone hopes never to need and everyone eventually thanks. Survivors are famously impossible to insult and impossible to stop.

Toyuhō Kagemori has taken this oath, passed this rite, and carries this reputation into every room. Decide how comfortably it sits — a character wearing their Guild loosely is as interesting as one wearing it proudly.

Style is a promise kept per panel.

LORE · THE SURVIVORS

The Inventory of What Was Saved

The story every Survivor is measured against.

After the flood, while others counted losses, a Seizon read aloud the list of what remained — three boats, one forge, all the children. The reading became the Ash Registrar's tradition, and the Survivors' answer to despair: begin from the assets.

CULTURAL NOTE

Seizon greet each other with 'Still here' — statement, question, and toast in two words.

YOUR SYMBOL

The Relit Hearth — Endurance is not the absence of ash — it is the second fire.

One day, the record-keepers will tell a story like this about Toyuho Kagemori. The pages that follow — the Hero Journey — are its first draft.

Detail is a spice, not a meal.

Totoro

My Neighbor Totoro · Studio Ghibli

ONE FAMILY, NO SEASONING

Totoro is circles all the way down — body, eyes, nose, claws softened to nubs. Zero triangles. The design commits so completely that a two-year-old reads 'safe' before the first frame ends.

SILHOUETTE TEST, PASSED FOREVER

Fill Totoro with black and you still know him — the Ghibli logo is literally that fill test, shipped on every film.

SCALE AS CHARACTER

He is enormous and does nothing threatening with it. Size against softness is the contradiction that makes him magnetic rather than merely cute.

RESTRAINT

Two colours, no costume, no accessories. Proof that subtraction is a design tool with no upper limit.

APPLIED TO YOUR RECORD — You are building the opposite commitment: Toyuho Kagemori leads with triangles. Study Totoro not to copy the circle but to copy the discipline — one family, held to, at every scale, until the silhouette alone is a signature.

Master studies teach principles, never imitation. Study why it works; design your own answer.

The second read is where love starts.

“

Not everyone can become a great artist,
but a great artist can come from
anywhere.

WRITTEN BY BRAD BIRD · RATATOUILLE (2007)

WHY THIS OPENS THE CHAPTER

A cast exists to test the hero from every direction — mentor, rival, monster. Bird's line is the test each of your eight companions poses to your character: greatness has no permitted address.

RELATIONSHIPS

The Cast Around You

No character exists alone. These eight figures are derived from Toyuho Kagemori's exact position on the wheel — each one is a design brief for a supporting character in your story.

The Hero	The Builder You Are Becoming
The Heroine	The Craftsman of the Crossing Path
The Mentor	The Elder Reformer of the Guild of Survivors
The Rival	The Philosopher Across the Wheel
The Ally	The Scout at Your Shoulder
The Monster	The Beast of Distrust and Isolation
The Villain	The Fallen Philosopher
The Shadow Self	The Survivor, Unchecked

WHY THIS MATTERS — Ensemble design is contrast management. Eight briefs above, one rule beneath them all: no two silhouettes may agree. The cast exists to make YOUR outline unmistakable in the group shot.

Draw ten cheap ideas before one dear one.

RELATIONSHIPS · THE HERO

The Builder You Are Becoming

Builder · Kensetsu · Order of Hunters

THE RAISED BEAM

WHY THEY ARE IN YOUR STORY

Your scores already lean toward the Builder — the wheel's natural next step from Survivor.

HOW YOU INTERACT

They act where you deliberate, and deliberate where you act; travelling together, each of you covers the other's blind quarter.

THE GROWTH LESSON

Craft is not a departure from Grit — it is where Grit goes next.

Design brief — give this character a silhouette that contrasts yours, one visual element borrowed from your palette, and one they could never wear.

Proportion is the first joke and the last law.

RELATIONSHIPS · THE HEROINE

The Craftsman of the Crossing Path

Craftsman · Takumi · Order of Hunters

THE FINAL PASS

WHY THEY ARE IN YOUR STORY

A quarter-turn across the wheel: close enough to understand you, far enough to surprise you.

HOW YOU INTERACT

Where your instinct says "Endure what breaks others", theirs says "Chase perfect in the detail" — and the story lives in the negotiation.

THE GROWTH LESSON

Precision — the strength you respect most because it costs you the most to practise.

Design brief — give this character a silhouette that contrasts yours, one visual element borrowed from your palette, and one they could never wear.

An outline should gossip about its owner.

RELATIONSHIPS · THE MENTOR

The Elder Reformer of the Guild of Survivors

Reformer · Kaikaku · Order of Giants

THE BROKEN CIRCLE REDRAWN

WHY THEY ARE IN YOUR STORY

Your own Guild, the other Order — proof your Calling can be answered a different way.

HOW YOU INTERACT

They will not correct your path; they will show you the map of theirs and let the difference teach.

THE GROWTH LESSON

"I will not accept a broken world when a better one is possible." — a promise you were never asked to make, kept by someone who shares your hall.

Design brief — give this character a silhouette that contrasts yours, one visual element borrowed from your palette, and one they could never wear.

Colour is temperature; temperature is intent.

RELATIONSHIPS · THE RIVAL

The Philosopher Across the Wheel

Philosopher · Tetsugaku · Order of Giants

THE HALF-CLOSED EYE

WHY THEY ARE IN YOUR STORY

You answer the same question differently: Should we understand first, or endure first?

HOW YOU INTERACT

Every plan you make, they counter — not from malice, but from a whole life of the other answer.
Beating them requires understanding them.

THE GROWTH LESSON

The day you can argue their answer at full strength is the day your own answer becomes earned instead of inherited.

Design brief — give this character a silhouette that contrasts yours, one visual element borrowed from your palette, and one they could never wear.

Nothing on the belt without a story in the bag.

RELATIONSHIPS · THE ALLY

The Scout at Your Shoulder

Scout · Teisatsu · Order of Hunters

THE FIRST FOOTPRINT

WHY THEY ARE IN YOUR STORY

Your other wheel-neighbour — near enough to trust on sight, different enough to be useful.

HOW YOU INTERACT

No speeches, no ceremony: they simply appear where you need a second pair of hands, already working.

THE GROWTH LESSON

Initiative — offered so casually you'll almost miss that it's a discipline.

Design brief — give this character a silhouette that contrasts yours, one visual element borrowed from your palette, and one they could never wear.

The fill test forgives nothing and lies never.

RELATIONSHIPS · THE MONSTER

The Beast of Distrust and Isolation

A figure beyond the wheel

WHY THEY ARE IN YOUR STORY

Every archetype's shadow, loosed into the world, takes a shape. Yours is distrust and isolation — made vast, made hungry.

HOW YOU INTERACT

Treats every calm moment as the quiet before the next disaster, and lets no one close enough to prove otherwise. As a creature, it does this to whole villages at a time.

THE GROWTH LESSON

It cannot be slain by your strength — your strength is what feeds it. It is starved by the thing you find hardest.

Design brief — give this character a silhouette that contrasts yours, one visual element borrowed from your palette, and one they could never wear.

Squares endure. Circles welcome. Triangles warn.

RELATIONSHIPS · THE VILLAIN

The Fallen Philosopher

Philosopher · Tetsugaku · Order of Giants

THE HALF-CLOSED EYE

WHY THEY ARE IN YOUR STORY

Not your opposite — your opposite's shadow, paralysis, with an army and a grievance.

HOW YOU INTERACT

Keeps asking the next question until the moment for an answer has already passed. They believe, sincerely, that this is the only answer left to the question you both carry.

THE GROWTH LESSON

They are what your Rival becomes without you — which means your Rival is what they could have been with you.

Design brief — give this character a silhouette that contrasts yours, one visual element borrowed from your palette, and one they could never wear.

Your character's silence should be drawable.

RELATIONSHIPS · THE SHADOW SELF

The Survivor, Unchecked

Survivor · Seizon · Order of Hunters

THE RELIT HEARTH

WHY THEY ARE IN YOUR STORY

Distrust and Isolation: your own signature strength, grit, taken to the extreme where it stops serving anyone.

HOW YOU INTERACT

Treats every calm moment as the quiet before the next disaster, and lets no one close enough to prove otherwise.

THE GROWTH LESSON

The shadow is not defeated once. It is out-practised daily — usually by borrowing one habit from your Opposite.

Design brief — give this character a silhouette that contrasts yours, one visual element borrowed from your palette, and one they could never wear.

Costume seams are the body's punctuation.

RELATIONSHIPS · ROSTER

The Perfect Team

If Toyuho Kagemori could choose any three companions for the Hunt, the wheel recommends these.

KENSETSU · THE BUILDER

Momentum — the Builder converts your grit into motion.

KAIKAKU · THE REFORMER

Perspective — the Reformer has already paid for the lessons you're about to buy.

KAITAKU · THE PATHFINDER

Depth — a fellow member of the Guild of Survivors, fluent in your Calling's craft.

What they refuse to wear is also design.

PROFESSIONAL SECRET · NO. 3

Every accessory should be earned.

If you cannot say where the character got it, the audience cannot feel why
they keep it.

“

You do not draw a character. You draw a
life that happens to be visible.

PARAPHRASED FROM GLEN KEANE'S ANIMATION LECTURES

— paraphrased, as labelled

WHY THIS OPENS THE CHAPTER

Keane animated Ariel and the Beast by acting the feeling before drawing the line. Your Hero Journey chapter is that feeling written down — act it before you draw a single pose.

HERO JOURNEY

The Hunt of Toyuho Kagemori

Seven beats of a personal Giant Hunt narrative — generated from your identity, your shadow, and your position on the wheel. Use it as the spine of your character's story, or argue with it. Both are canon.

01 Why You Were Chosen

02 The Quest

03 The Greatest Fear

04 The Hidden Strength

05 The Greatest Trial

06 The Transformation

07 The Final Destiny

Hair is shape first, strands never.

HERO JOURNEY · BEAT 1 OF 7

Why You Were Chosen

Toyuho Kagemori was not chosen for being flawless. The Order of Hunters marked them because, of everyone in The Broken Heart, they alone answered the old question the way a Survivor must — endures; resilience is the value they hold above all others. The Giant Hunt does not summon the strongest. It summons the necessary.

Hands sell what faces oversell.

HERO JOURNEY · BEAT 2 OF 7

The Quest

To carry the relit hearth across all five realms and prove that "I will rise from the ash, proving that our light cannot be crushed." is not a motto but a method — sealing their name, Toyuho become Toyuho Kagemori, into the record of the Hunt.

The villain is the hero's habit, unsupervised.

HERO JOURNEY · BEAT 3 OF 7

The Greatest Fear

Not death, and not defeat — distrust and isolation. Treats every calm moment as the quiet before the next disaster, and lets no one close enough to prove otherwise. Toyuho Kagemori has seen this happen to greater Survivors, and lies awake knowing the difference between them was never talent.

Redesign is biography, never reset.

HERO JOURNEY · BEAT 4 OF 7

The Hidden Strength

Beneath the Survivor runs a quieter current of the Builder:
craft, surfacing exactly when the primary path fails.
Enemies who prepare for a Survivor are never prepared for
that.

Draw the wound where the eye lands second.

HERO JOURNEY · BEAT 5 OF 7

The Greatest Trial

The Hunt will force the question the wheel has always asked of them — and their answer will pull them toward the Builder's path or harden them against it. The trial is not the Giant. The trial is choosing, at full cost, in front of everyone, what a Survivor is for.

A silhouette is a signature you can shout.

HERO JOURNEY · BEAT 6 OF 7

The Transformation

They enter the Hunt a Survivor and leave something the wheel has no single name for: a Survivor who has learned the Builder's craft without surrendering their own grit. The shadow of distrust and isolation does not vanish — it is finally, daily, out-practised.

Value does the work; hue takes the credit.

HERO JOURNEY · BEAT 7 OF 7

The Final Destiny

A place among the Hunters' honoured names — the
Survivor whose path becomes a route others can walk,
whose grit outlives the Hunt that demanded it.

Every belt earns rent or moves out.

Monkey D. Luffy

One Piece · Eiichiro Oda

THE HAT IS THE STORY

The straw hat is a debt to be repaid — a promise worn on the head, breaking the skull's outline so it survives the fill test at any size.

SIGNATURE BREAK

Oda gives every crew member one outline-breaking element. Luffy's hat, Zoro's three swords, Sanji's suit — a crew shot reads as pure silhouette.

SIMPLICITY IS ENDURANCE

Vest, shorts, sandals: a design drawable ten thousand times without fatigue. Twenty-five years of weekly chapters is the argument.

SCAR ECONOMY

Two scars, both with stories the audience watched him pay for. Damage is never texture — it is receipts.

APPLIED TO YOUR RECORD — Give Toyuho Kagemori one outline-breaking element that carries a promise — your symbol worn large, a tool that will not fit a bag. Then simplify everything else until that break is the loudest shape in the fill test.

Master studies teach principles, never imitation. Study why it works; design your own answer.

The brow is the loudest muscle.

“

Quality is the best business plan.

JOHN LASSETER

WHY THIS OPENS THE CHAPTER

The Blueprint chapter converts everything known about you into professional design decisions. Quality here means fit — every recommendation earns its place by matching who the record says you are.

BLUEPRINT

Character Design Blueprint

A professional design brief for drawing Toyuho Kagemori — derived from Order, Realm, Calling and archetype. Recommendations, not rules: your hand makes the final call.

SHAPE LANGUAGE

TRIANGLE — Lead with triangles in costume blocking, props and hair masses; use the opposing shape family only for the shadow-self and villain variants.

WHY

Grit and Adaptability are triangle-family traits in classical design theory.

HEIGHT & BUILD

Agile proportions: 6.5–7 heads with longer limb ratio, weight on the balls of the feet. Built to be drawn mid-stride.

SILHOUETTE

Directional and dynamic — a silhouette with a point: angled shoulders or hips, asymmetric layers, gear that sweeps toward the character's intent.

WHY THIS MATTERS — triangles appear here because your two strongest traits sit in the triangle-family of classical shape theory. When a recommendation and your instinct disagree, your instinct wins — but now it argues against a stated reason, which sharpens both.

Draw weight, and balance arrives free.

Colour Palette

The Broken Heart materials with the Hunter signal accent. Keep the accent under ten percent of the design — it should be findable, not loud.

Ash Char
#33302E

Primary — garments, base tone

Seam Grey
#B9B3AA

Secondary — patches, visible repairs

Ember Rust
#9A4A2E

Support — worn edges, heat marks

Hunter Signal
#FF6467

Accent — Order insignia, eyes of the design

Print note — these values are screen hexes; when working in markers or paint, match by eye against the printed chips above rather than the numbers.

Reference is a ladder, not a chair.

Face, Eyes & Hair

FACE & EYES

Angular cheekbones, keen tapered eyes, sharp hair spikes or a swept cut that carries the diagonal into the face.

HAIR

Swept, directional masses with 2–3 large spike groups — avoid many small spikes, which fragment the read.

PERSONALITY EXPRESSION

Default expression carries grit; the 'tell' — the micro-expression under stress — should hint at distrust and isolation without stating it.

A character's shadow belongs in the acting long before it enters the plot.

Exaggeration is honesty at volume.

Costume, Accessories & Arms

COSTUME

Base layers in The Broken Heart materials (see palette), cut in triangle-family blocks; one field layer carrying the Guild of Survivors insignia at chest or shoulder.

ACCESSORIES

A worn, personal token referencing "The Relit Hearth" — small enough for close-ups, distinctive enough for merchandise.

WEAPON / TOOL

Whatever is at hand, maintained obsessively.

TEXTURES

Visible repairs: seams, patches, re-stitched panels. Damage kept legible, per Harai building tradition.

The memorable is the removable, kept.

BLUEPRINT · PERFORMANCE

Motion & Acting

MOTION STYLE

Fast in-betweens, sharp stops. Anticipation poses coiled low; action lines always diagonal.

WHY

Animation and pose sheets should express grit kinetically, not just visually.

When you reach the pose sheets in the workbook, act these notes out physically before drawing them — five seconds of standing the way your character stands teaches more than an hour of reference-hunting.

Two shapes agree; three shapes argue.

Spider-Man

Marvel · Steve Ditko design

TWO-VALUE MASTERY

Red on blue is a warm-advance / cool-recede pairing: the torso and head (story zones) come forward, the limbs sit back. The eye is steered by temperature alone.

THE MASK PROBLEM, SOLVED

No visible face, so the eye-shapes were designed as graphic objects — enlarging and narrowing like a logo with moods. Expression without anatomy.

THE WEB-LINES

Costume texture that doubles as construction lines — they explain the body's curvature the way a 3D wireframe would. Texture with a job.

READS AT ANY DISTANCE

Full figure: red/blue masses. Mid-shot: spider emblem. Close-up: eye shapes. Three reading distances, three deliberate signals.

APPLIED TO YOUR RECORD — Your palette page caps the Hunter Signal accent under ten percent — Spider-Man is why that rule exists at all: hierarchy, not fireworks. Assign each of your four colours a reading distance, and let the accent own the close-up.

Master studies teach principles, never imitation. Study why it works; design your own answer.

Give the eye a path or it leaves.

PROFESSIONAL SECRET · NO. 4

Rendering never fixes weak design.

Polish is a multiplier. Multiply a weak idea and you get a shinier weak idea.

“

Every artist has thousands of bad drawings in them, and the only way to get rid of them is to draw them out.

CHUCK JONES · WARNER BROS., LOONEY TUNES

WHY THIS OPENS THE CHAPTER

Nine lessons follow. None of them will make your first drawing good — they will make your hundredth drawing extraordinary. Jones is telling you the price, and promising it is payable.

MASTERCLASS · LESSON 1 OF 9

What Character Design Actually Is

Character design is decision-making made visible — not rendering skill.

THE JOB

A character design answers three questions at a glance: who is this, what do they want, and what will they do to get it. Every line either supports one of those answers or dilutes it.

READ ORDER

Viewers read silhouette first, colour second, face third, details last. Budget your effort in exactly that order — a perfect eye on a mushy silhouette is wasted work.

THE ONE-SENTENCE TEST

Before drawing, write your character in one sentence including a contradiction: 'a gentle giant terrified of breaking things.' Contradiction is what makes a design feel alive rather than assembled.

ITERATION

Professionals draw ten cheap thumbnails before one expensive drawing. Quantity first, quality second — the good design is usually hiding around thumbnail seven.

A prop at rest tells the longest story.

Anime Construction Basics

Anime style is a construction method, not a shortcut.

HEAD FIRST

The head unit measures everything: standard anime bodies run 6–7.5 heads tall. Pick your head count and hold it on every sheet — inconsistency here is the most common beginner tell.

THE CRANIUM + JAW

Build the head as a ball (cranium) plus a wedge (jaw). The eye-line sits lower than realism — roughly halfway or below — leaving the large forehead the style expects.

EYES AS DESIGN OBJECTS

Anime eyes are designed shapes, not anatomy. Decide your character's eye shape (frame, iris size, highlight count) once, on the eye sheet, then treat it as a logo: reproduce, don't reinvent.

LINE ECONOMY

The style's power is selective detail: dense information at face, hands and costume focal points; near-empty simplicity everywhere else. If everything is detailed, nothing is.

Design the tell before the smile.

Shape Language

Circles feel friendly, squares feel reliable, triangles feel dangerous — audiences know this before they know they know it.

THE THREE FAMILIES

Circle: approachable, soft, trustworthy. Square: stable, strong, stubborn. Triangle: fast, sharp, threatening. Every memorable character leads with one family and seasons with a second.

WHERE IT LIVES

Shape language operates at every scale — overall silhouette, costume blocks, hair masses, even eyebrow angles. Consistency across scales is what makes a design feel inevitable.

CONTRAST FOR CAST

Give allies contrasting shape families so group shots read instantly. Your dossier's companion pages specify contrasts for exactly this reason.

BREAKING THE RULE

A round-shaped villain or triangular healer is a deliberate, powerful choice — but only reads as deliberate if the rest of the design is disciplined.

Consistency is what turns marks into style.

Silhouette

If the design works filled with solid black, it works.

THE FILL TEST

Flood your character with black. Can you still tell who it is, what they carry, and what they're feeling? That's the whole test, and professionals run it on every pass.

POCKETS OF SKY

Strong silhouettes trap negative space — the gap inside a bent elbow, between blade and hip. These 'pockets of sky' are what make an outline legible at thumbnail size.

THE BIG-MEDIUM-SMALL RULE

Divide the silhouette into one big mass, one medium, one small. Equal-sized masses read as noise; the 60/30/10 rhythm reads as design.

SIGNATURE BREAK

Give the outline one element that breaks its overall flow — a trailing sash, an asymmetric shoulder, your symbol worn large. That break is what fan artists will draw first.

The ground line is the first anatomy.

MASTERCLASS · LESSON 5 OF 9

Costume Design

Costume is biography you can draw.

FUNCTION FIRST

Every costume element should answer 'why do they wear this?' — climate, work, rank, memory. Your realm's lore pages list the materials; use them as your fabric store.

LAYER LOGIC

Build in layers with a story: base layer (climate), work layer (calling), status layer (order/rank), personal layer (the keepsake). A costume with layer logic survives redesigns and spin-offs.

WEAR AND TEAR

Decide where the costume is worn, patched or stained. Damage placement tells the audience how this body moves and what it has survived — cheaper than a backstory page.

THE 70/25/5 PALETTE

Dominant colour 70%, secondary 25%, accent 5%. Your dossier palette page is pre-mixed to this ratio — the accent is your Order colour.

Draw the childhood; the posture follows.

MASTERCLASS · LESSON 6 OF 9

Colour Theory for Characters

Colour is emotional shorthand — spend it deliberately.

VALUE BEFORE HUE

Convert to greyscale: if the design muddies, no hue choice will save it. Aim for three clearly separated value zones before choosing a single colour.

TEMPERATURE TELLS

Warm colours advance and invite; cool colours recede and compose. A cool character with one warm element (eyes, a scarf, a scar) directs attention exactly where you want it.

SATURATION DISCIPLINE

Full saturation everywhere exhausts the eye. Keep large areas muted and let small areas sing — your 5% accent should be the most saturated note in the design.

COLOUR SCRIPTING

Plan how the palette shifts with story mood: the same character at their darkest hour, desaturated; at triumph, accent blazing. One palette, scripted, beats five palettes.

An empty pocket is wasted lore.

Expression Design

A character who can only make one face is a statue.

THE CORE SIX

Master your character's joy, anger, sorrow, fear, surprise and disgust before inventing subtle blends. The expression sheet in your workbook is laid out for exactly these.

ASYMMETRY IS LIFE

Real expressions are asymmetric — one brow leads, one mouth corner wins. Perfectly mirrored faces read as masks.

THE CHARACTER FILTER

Run every emotion through personality: how does THIS character do anger — loud, cold, smiling? Your archetype's field notes (stress behaviour) are the acting reference.

EYEBROWS DO THE WORK

In anime construction, brows and upper lids carry most of the emotional signal. When an expression isn't landing, fix the brows before touching anything else.

Big, medium, small — then stop.

Pose Design

Pose is personality under gravity.

LINE OF ACTION

Every pose starts as a single curved line — the spine of the idea. Draw it first, then hang the body on it. Poses built limb-by-limb read stiff no matter how well rendered.

WEIGHT AND BALANCE

Decide where the mass sits: a guardian plants weight through both heels; a scout floats it on the balls of the feet. Your blueprint's motion notes specify your character's default.

SILHOUETTE AGAIN

Run the fill test on every pose. Clear poses keep limbs off the torso's mass and trap negative space. If elbows vanish into ribs, rotate the pose, don't render harder.

STORY POSES

Beyond action: design a waiting pose, a losing pose, a lying pose. The quiet poses are where personality actually lives — and where judges look for it.

Contrast of shape beats contrast of colour.

MASTERCLASS · LESSON 9 OF 9

Professional Workflow

How working designers get from blank page to final sheet.

THUMBNAILS (10+)

Tiny, fast, fearless. No erasing, no faces, silhouette only. You are shopping for an idea, not making a drawing.

CONSTRUCTION PASS

Take the winning thumbnail to full size in simple volumes — head unit, ribcage, pelvis, limb cylinders. Fix proportion here; it is ten times cheaper than fixing it in line.

DESIGN PASS

Costume blocks, hair masses, props — still no detail. Run the fill test and the 70/25/5 palette in flats.

FINAL LINE & PRESENTATION

Clean line weight (thicker outside, thinner inside), flat colour, minimal shading. Present on the turnaround sheet: front, side, back, same head count, same ground line. This is the format the Giant Hunt expects.

The back view is where honesty hides.

DESIGN LIKE... · STUDIO GHIBLI

Design Like Studio Ghibli

Character serves world; stillness is content.

MA — THE PAUSE

Ghibli protects 'ma': beats where nothing happens so the audience can feel. Design translation — give your character one restful pose and one prop that only matters when they are still.

ORDINARY FIRST

Ghibli heroes look like people before they look like heroes; wonder lands harder from a believable base. Keep one boring, functional garment in your design.

NATURE HAS AGENCY

Environments act on characters — wind, rain, mud are co-stars. Your realm's weather should be visible somewhere on the costume.

FOR YOUR SHEET — For your character: draw the waiting pose from the workbook FIRST, before any action pose. If the design is boring at rest, Ghibli would send it back.

Philosophy, never imitation — these pages teach how a studio thinks, not how it renders.

Softness placed on strength reads as depth.

DESIGN LIKE... · SPIDER-VERSE

Design Like Spider-Verse

Style is identity — every character keeps their native visual language.

ONE WORLD, MANY GRAMMARS

Each Spider-person is rendered in their own idiom — anime cel, noir print, picture-book. The film proves styles can share a frame if each is disciplined internally.

FRAME-RATE AS CHARACTER

Miles animates on twos while mentors move on ones — literally out of step until he masters his powers. Motion style is characterisation.

GRAPHIC HONESTY

Halftones, chromatic offsets, hand-drawn effects — the film shows its materials. Let your linework admit it was drawn by a hand.

FOR YOUR SHEET — Choose ONE stylistic signature for your sheet — a line quality, a texture, a printing flaw — and apply it with total consistency. One accent of style, like one accent of colour.

Philosophy, never imitation — these pages teach how a studio thinks, not how it renders.

One garment should be boring on purpose.

DESIGN LIKE... · ARCANÉ

Design Like Arcane

Painterly surfaces over brutal clarity of shape.

PAINT ON STRUCTURE

Arcane looks hand-painted, but under the brushwork the silhouettes are ruthless — every character passes the fill test before a single stroke lands.

TWO CITIES, TWO PALETTES

Piltover gleams gold-and-blue; Zaun glows toxic green. Faction palette does half the storytelling before dialogue starts. Your Order and Realm are your two cities.

DAMAGE TELLS TIME

Characters age in scars, hair changes and patched gear across acts. Design your character with one 'act two' variant in mind — what breaks, what gets repaired.

FOR YOUR SHEET — Draw your turnaround clean, then produce one 'after the battle' pass: same silhouette, new damage. If the damage placement feels arbitrary, your costume logic needs work.

Philosophy, never imitation — these pages teach how a studio thinks, not how it renders.

Let the weather touch the costume.

DESIGN LIKE... · PIXAR

Design Like Pixar

Simplify until only the story remains.

SHAPE THESIS

Every Pixar lead reduces to a sentence of geometry: Carl is a square (stubborn), Russell an egg (unformed), EVE an ellipse (perfect, sealed). Write your character's geometry sentence.

APPEAL ≠ PRETTY

Appeal means the eye wants to keep looking. Asymmetry, imperfection and specificity generate appeal faster than beauty does.

RESEARCH OBSESSION

Pixar sends artists to depths and deserts before designing a fish or a car. Your research field is this dossier — realm materials, guild tools, archetype acting notes.

FOR YOUR SHEET — Write the geometry sentence for your character in the margin of the blueprint page — subject, dominant shape, contradiction. If you cannot write it, you are not ready to draw it.

Philosophy, never imitation — these pages teach how a studio thinks, not how it renders.

Speed lines start in the shoulders.

INDUSTRY BREAKDOWN

How an Anime Character Reaches the Screen

The pipeline behind every anime character sheet — and why your workbook mirrors it.

CONCEPT / MANGA SOURCE

A designer or mangaka fixes the identity: silhouette, palette, signature break.

SETTEI — THE MODEL SHEET

Turnarounds, expression sheets, hand studies at fixed head-counts — the exact sheets in your workbook. Hundreds of animators must draw the character identically; settei is the contract.

KEY ANIMATION

Genga artists act the character in poses; the design's shape language dictates how they move.

COLOUR DESIGN

A dedicated iro-shitei artist locks palette per lighting situation — day, dusk, battle.

THE LESSON — Nothing in professional animation is drawn twice from imagination — it is drawn once with intent, then reproduced with discipline. Your turnaround sheet is you signing that contract with yourself.

A design is done when removal hurts.

INDUSTRY BREAKDOWN

How Pixar Builds a Character

From research trip to render farm — the longest character pipeline in the industry.

STORY FIRST

No design exists until the character has a want, a flaw and an arc. Design begins as writing.

RESEARCH & SIMPLIFY

Field research, then reduction: hundreds of sketches distilled to one geometry thesis.

SCULPT & TEST

Maquettes and digital sculpts are lit, posed and 'acted' before approval — the fill test in three dimensions.

SIMULATION BUDGET

Every costume element costs simulation time, so each must justify itself — the industrial version of 'every accessory is earned'.

THE LESSON — Pixar's real secret is sequencing: psychology before geometry, geometry before costume, costume before polish. This dossier is arranged in exactly that order on purpose.

The mask is a face you get to design.

INDUSTRY BREAKDOWN

How Riot Designs a Champion

Character design under the hardest constraint set in the business: readable at 1cm tall, in a crowd, in 0.2 seconds.

THE FANTASY STATEMENT

One sentence of promise — 'the blade that refuses to die' — approved before any art.

SILHOUETTE GATES

Concepts are reviewed as black shapes at gameplay camera distance. Fail the gate, restart — rendering is not permitted to rescue a shape.

COLOUR FOR TEAMFIGHTS

One dominant hue plus one accent, testable against thirty effects exploding at once. The 70/25/5 rule under live fire.

KIT COHERENCE

The character's abilities must be legible from the design — a hook needs a visible hook. Form promises function.

THE LESSON — Constraint is the best design teacher you can hire for free. Draw your character at 3cm tall as a final exam — whatever survives is the actual design.

Draw the promise the character made.

Naruto Uzumaki

Naruto · Masashi Kishimoto

ORANGE, EXPLAINED

The village shuns him; orange is the colour that refuses to be ignored. The costume argues with his circumstances — that argument IS the character.

SHAPE OVER TIME

Spiky triangle hair (danger, energy) over a rounded jumpsuit (approachability): the contradiction of a threat who wants to be loved.

EVOLUTION WITH RECEIPTS

Every costume change tracks an earned rank — same orange thesis, more discipline in the cut. Redesign as biography, never as reset.

THE HEADBAND SYSTEM

One accessory carrying allegiance, plot state (scratched = rogue) and silhouette break at once. Accessories that multitask survive redesigns.

APPLIED TO YOUR RECORD — Ask what Toyuho Kagemori's costume argues with. Your shadow is distrust and isolation — the costume can defy it (a Survivor who wears open, welcoming layers) or confess it (armour everywhere). Both are theses; pick one on purpose.

Master studies teach principles, never imitation. Study why it works; design your own answer.

Texture must pay for its noise.

PROFESSIONAL SECRET · NO. 5

Design emotion before beauty.

Beautiful and forgettable ship together constantly. Felt and imperfect is the
rarer cargo.

“

There is no shortcut hiding behind
talent — the hand learns by repetition
what the eye already knows.

PARAPHRASED FROM YUSUKE MURATA'S INTERVIEWS ON PRACTICE

— paraphrased, as labelled

WHY THIS OPENS THE CHAPTER

Murata redrew One-Punch Man chapters he had already finished, for free, because the hand could do better. These worksheets are your version of that discipline — cheap paper, honest reps.

Seven Drills Before the Sheets

Run this ladder once on scrap paper before the formal worksheets. Each rung removes a crutch — what survives all seven is your actual design.

1 · CIRCLES ONLY

Draw your character using nothing but circles. — Forces you to find the design's softness — even a triangle-lead character has circle moments, and now you know where they live.

2 · TRIANGLES ONLY

Redraw the same pose using nothing but triangles. — The opposite pressure. Between these two extremes, your actual shape mix reveals itself.

3 · STRIP THE GEAR

Redraw with every accessory removed. — If the character disappears without their props, the design is a costume rack. The body language must carry identity on its own.

4 · SILHOUETTE ONLY

Fill the figure with solid black. No interior lines. — The professional gate. If this fails, return to step one — nothing after this step can save a failed fill.

5 · FROM MEMORY

Close the book. Draw the character without reference. — Whatever you remembered is the design. Whatever you forgot was noise — consider deleting it.

6 · EXAGGERATE 150%

Push every proportion past comfort: longer, sharper, heavier. — Timid designs die in crowds. You can always retreat from too far; you cannot rescue too safe.

7 · SIMPLIFY TO TEN LINES

Draw the character in ten strokes or fewer. — The final compression. What survives ten lines is your character's true signature — protect it in every future drawing.

Every palette needs a bored colour.

COSTUME STUDY

Weapon / Tool Sheet

Draw it as a used object: wear at the grip,
maintenance marks, how it's carried when
NOT in use.

Violet Evergarden

Violet Evergarden · Kyoto Animation

THE GLOVES

A former weapon learning to write letters — so the design stages its whole story at her hands: white gloves over metal prosthetics. The wound and the aspiration, same location.

UNIFORM AS REBIRTH

The Doll uniform is deliberately soft — ribbons, pleats, a silhouette with no remaining edge — worn by a character who was all edge. Costume records the direction of change.

THE BROOCH

One emerald accessory, priced in story (a gift bought with her first earnings, matching her eyes). Small, close-up scaled, unforgettable — the accessory rulebook in one object.

ACTING THROUGH RESTRAINT

Her expressions barely move; the animation spends its budget on hands. Where a character emotes is a design decision, not an anatomy fact.

APPLIED TO YOUR RECORD — Decide where Toyuho Kagemori emotes. The blueprint gives you a default expression and a stress tell — choose the body part that betrays them (hands, jaw, shoulders) and give the workbook's expression sheet that bias.

Master studies teach principles, never imitation. Study why it works; design your own answer.

The first thumbnail is a throat-clearing.

PROFESSIONAL SECRET · NO. 6

The quiet poses are where
personality lives.

Anyone can pose a punch. Judges look at how your character waits.

“

Animation offers a medium of
storytelling and visual entertainment
which can bring pleasure and
information to people of all ages
everywhere in the world.

WALT DISNEY

WHY THIS OPENS THE CHAPTER

The Giant Hunt ends with your drawing joining thousands of others — a world-record cast of original characters. This chapter is the practical bridge from your desk to that record.

Designing Your Character

Everything in this dossier converges here: turning Toyuho Kagemori into a finished, hand-drawn character.

STEP 1 — READ YOUR BRIEF

Your Blueprint pages are the design brief: shape language, proportions, palette, costume logic. Read them twice before touching paper.

STEP 2 — THUMBNAIL

Ten small silhouettes using the workflow lesson. Choose the one that passes the fill test at thumbnail size.

STEP 3 — BUILD ON THE SHEETS

Work through the workbook in order: head grid → eyes → expressions → poses → costume → turnaround. Each sheet feeds the next.

STEP 4 — FINAL TURNAROUND

Present front, side and back on the turnaround sheet at a consistent head count. Flat colour from your palette page. This is your submission artwork.

Act it for five seconds; draw it for an hour.

Submission Guidelines

WHAT TO SUBMIT

One hand-drawn character design of your Giantverse identity — traditional or digital, drawn by you. AI-generated artwork is not eligible; this dossier deliberately contains recommendations, never images, for that reason.

FORMAT

A clear photograph or scan of your artwork. Include your Giantverse ID and Legacy Name exactly as printed on your Identity Record page.

ORIGINALITY

The design must be your own work, created for the Hunt. Reference is encouraged; tracing and copying are not.

ONE IDENTITY, ONE ENTRY

Each Giantverse identity submits once. Iterate privately on the worksheets — submit only your best turnaround.

Full and current terms are published on the official Giant Hunt submission portal; where this page and the portal differ, the portal governs.

Your line weight is your voice volume.

Timeline & Judging

PHASE 1	Identity discovery — complete (you are holding the proof)
PHASE 2	Design window — worksheets, iterations, final turnaround
PHASE 3	Submission window — upload via the official portal
PHASE 4	Verification & record attempt — see next page
PHASE 5	Judging, gallery & honours

JUDGING CRITERIA

Silhouette clarity, shape-language discipline, palette control, costume logic, and — weighted heaviest — how convincingly the design expresses the identity in this dossier. Judges receive your archetype, not your name.

WHO JUDGES

A panel of working artists and educators from the Image Group's design faculty and invited industry professionals.

Exact dates are announced on the portal and by email to registered participants.

Symmetry is a mask; break it to breathe.

The World Record Attempt

THE ATTEMPT

The Giant Hunt is organised as an official Guinness World Records attempt for original character designs created within a single campaign. Every verified, guideline-compliant submission counts toward the total.

WHAT VERIFICATION MEANS

Independent adjudication requires each entry to be an original, individually-created character design with a verifiable creator. Your Giantverse ID is your verification key — keep this dossier.

YOUR PART

Toyuho Kagemori is one name in the attempt. If the record stands, every counted participant is part of a world record — permanently, and provably.

AFTER SUBMISSION

You'll receive confirmation of receipt, then verification status, then — record or not — your entry joins the public Giantverse gallery unless you opt out. Selected designs are featured; all verified designs are counted.

The icon survives the illustration.

FOUNDER'S PASS

Founding Creator Benefits

The Giant Hunt Founder's Pass makes Rajeev a founding creator of the Giantverse platform — the first cohort, permanently marked as such.

YOURS NOW

Lifetime access to this Giantverse identity profile and dossier — view online and re-download anytime. Founding Creator badge on your identity record. Verified entry in the Giant Hunt and the world record attempt.

PLANNED PLATFORM BENEFITS

As the Giantverse platform grows, founding creators are first in line for: a public creator profile, access to future platform updates and creator tools, eligibility for a future creator marketplace, and priority entry to future competitions and events.

THE HONEST PRINT

Items listed as planned are exactly that — planned platform benefits and future features under active development, not guaranteed outcomes and not financial returns of any kind. What you are buying today is fully delivered today: this dossier, the masterclass, the workbook, and your verified place in the Hunt.

Feet placement is a personality test.

FOUNDER'S PASS

Go Draw

Everything before this page was analysis. Everything after it is craft — and craft only happens on paper.

You have a name, a realm, a calling, a cast, a story, a brief, a masterclass, six master studies, three studio pipelines and fourteen sheets of guides. You have, without noticing, completed a character design course. The Giantverse has done its part.

The Hunt is waiting, Toyuho Kagemori.

COLOPHON

About This Edition

Character Genesis Dossier 2.0 — Premium Collector's Edition. Composed for Toyuho Kagemori, record GV-TOY23, from the Giantverse identity engine. One hundred design sparks are scattered through these pages; the first is on the Identity record, the last is below. All studio and character analyses are educational commentary; all rights in the works discussed remain with their creators. Quotes are verbatim where attributed plainly and labelled where paraphrased.

Finish. The finished ugly teaches; the perfect unfinished doesn't.
